EOS™

The **Grid** for the **People**, with the **People**.

# Imagine having no power in your home

21 hours a day.

# 700 Million Africans are without power.

## A solar park?

- Too expensive, complex, risky, and not profitable.
- A very fluctuant demand

## Selling to individuals?

- Too small volumes and hard to scale
- Too much Global competition

## Payment facilities?

- Accessibility problem of payment traceability
- Bankization rate

**And still, the market is there.**

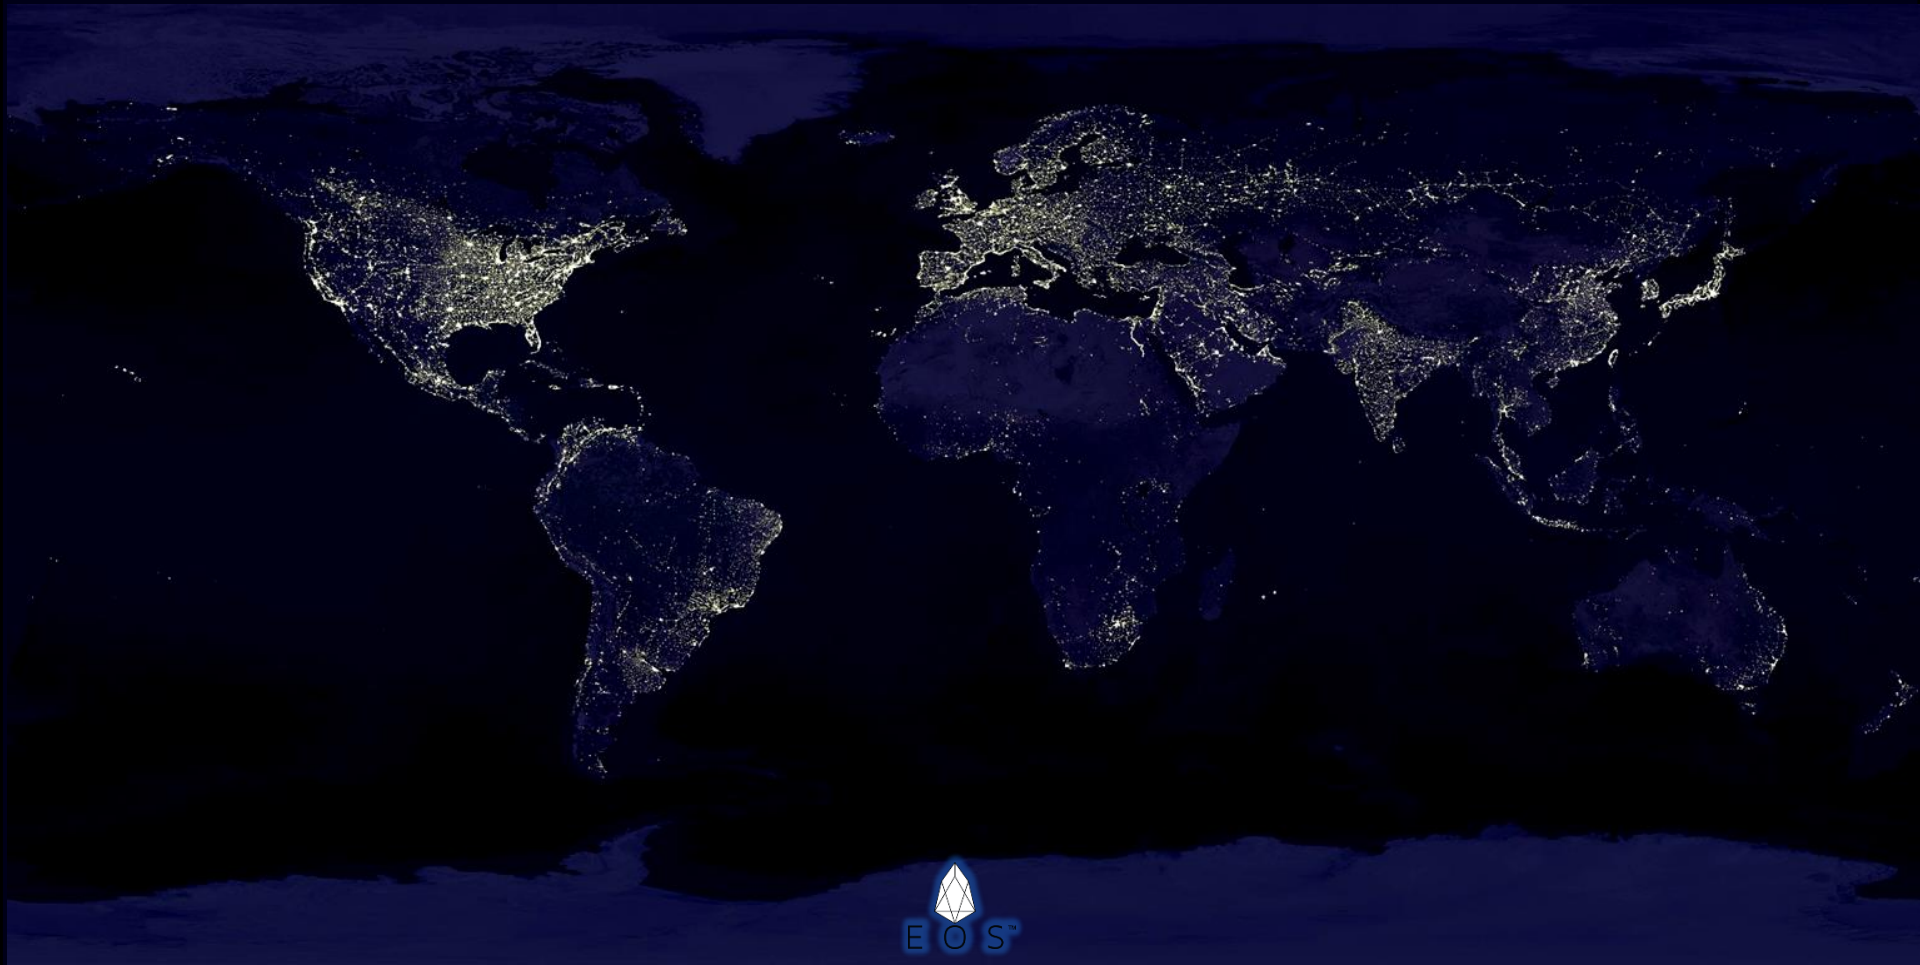

# The Solar park was already there, just LOOK

**Renewable energy will facilitate half of sub-Saharan Africa's power generation growth by 2040 (Src: IEA)**

# Our goal by 2030,

Provide clean electricity for 700 million people.

# HOW?

Ease  
households  
**access to  
clean energy**

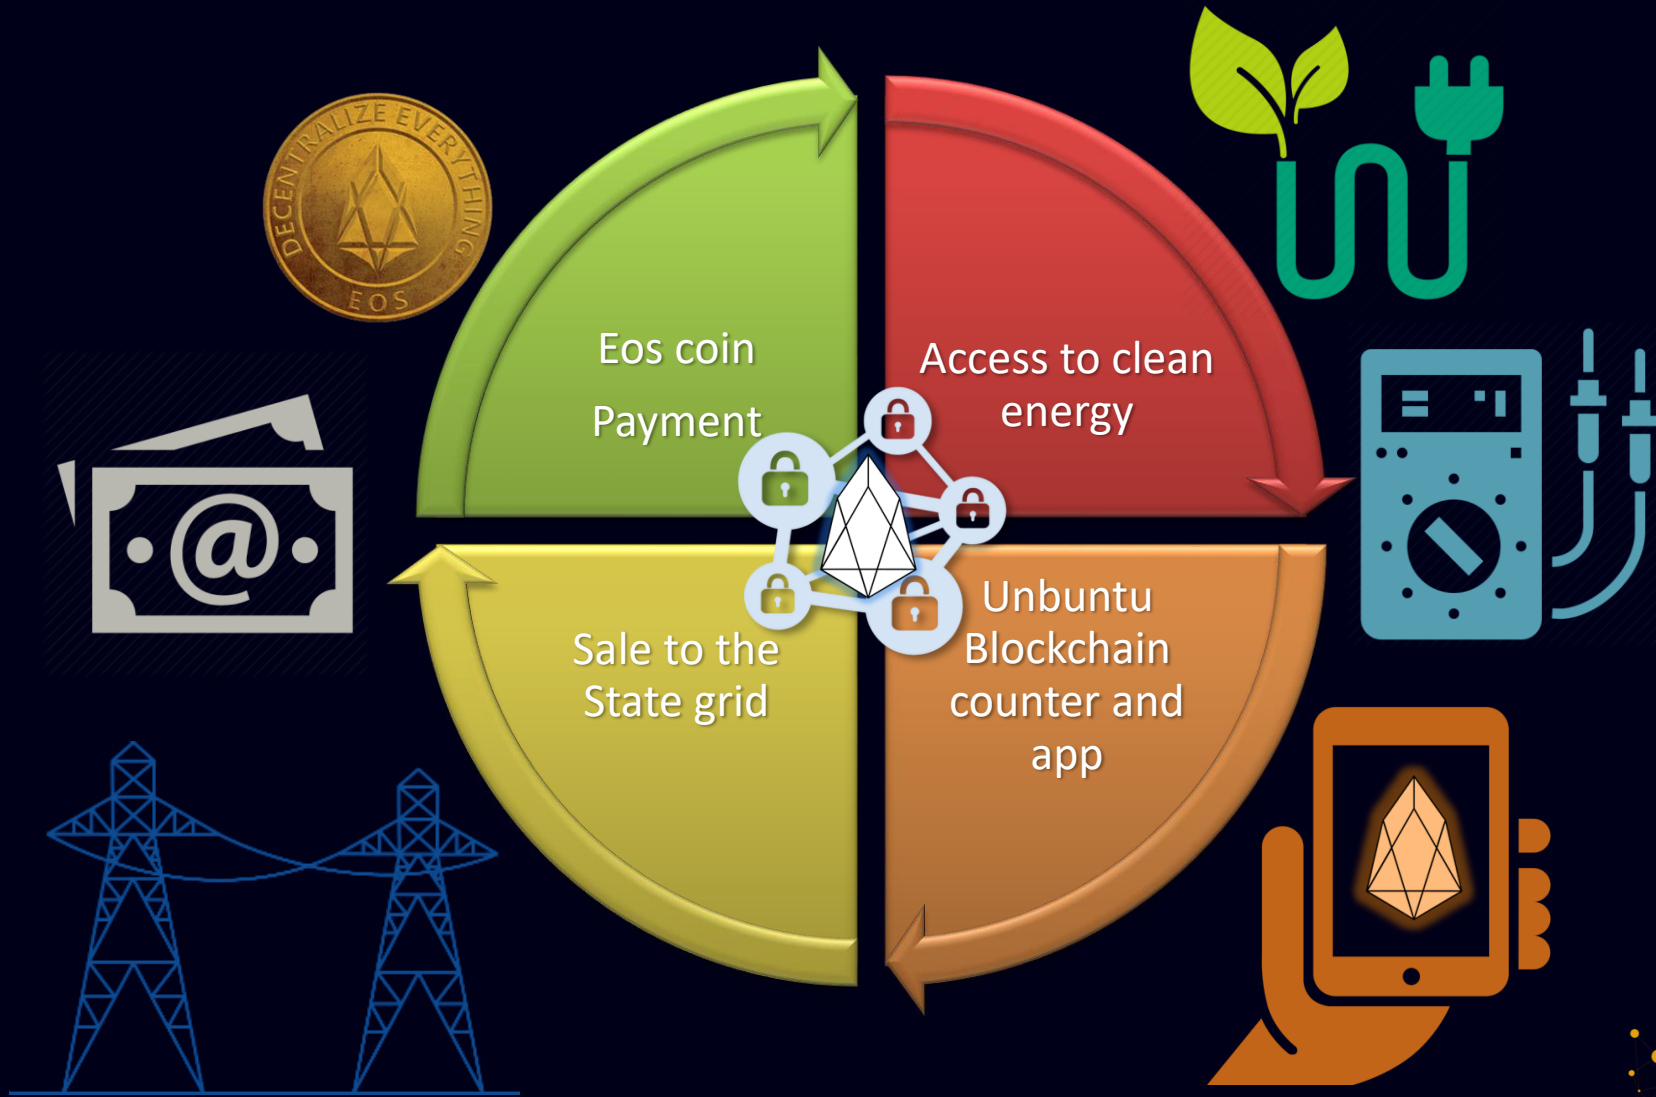

Making  
households  
**earn money**  
from their  
**energy  
surplus**
